

6D-WAN Transformation Assessment

Align your 6D-WAN deployment to your digital transformation challenges.

Contact your Account Manager or email brilliance@6dg.co.uk

Is your organisation adapting to a 'new normal' model of hybrid remote and office-based working? Do you need to extend your corporate network's functionality and security to users' homes? 6D-WAN, Six Degrees' industry-leading SD-WAN solution, consolidates security functionality with network functionality, all within a fully-managed service that is future-proofed, scalable and flexible from day one and throughout.

6D-WAN, powered by industry-leading cyber security technology, leverages next generation **secure** SD-WAN capabilities to deliver **high performance**, application-aware routing whilst providing **cost efficient** hybrid networking. Reduce friction to the cloud whilst maximising throughput, resiliency and security, all through a **fully-managed** end-to-end solution that secures and optimises your network. 6D-WAN provides the dynamic network fabric that unites your cloud, connectivity and security operations, powering your enterprise transformation strategy and enabling your operational brilliance.

6D-WAN Transformation Assessment

The 6D-WAN Transformation Assessment enables your organisation to take the next step on its digital transformation journey. Over a six-week period, Six Degrees will identify and contextualise your cloud transformation challenges, demonstrating how 6D-WAN addresses them and optimising your deployment prior to a potential wider roll-out.

1. Review your current network and identify issues or limitations.
2. Agree design and success criteria for 6D-WAN.
3. Deploy 6D-WAN on a six-week trial basis.
4. Review and report on changes as they happen.
5. Once success criteria have been met, transition to full roll-out.

Overcome Cloud Transformation Challenges

	6D-WAN Features	Outcome
PERFORMANCE	Use all available connections	Users benefit from optimised network performance both in the office and at home.
	Application-aware QoS traffic steering	
	Granular visibility	
	Agile home working	
SECURITY	Smart, secure local breakout	Extend security functionality from the corporate network right through to network endpoints.
	Reduce cloud friction	
	Agile home working through remote VPN and endpoint protection	
	Next generation firewall technology	
MANAGEMENT	Fully-managed service	Relieve management burden whilst maintaining control with end-to-end management and comprehensive visibility and reporting.
	Full estate visibility and granular reporting	

Six Degrees will deliver its 6D-WAN Transformation Assessment **free of charge*** for the initial six-week period. To speak to one of our experts about how you can align your 6D-WAN deployment to your digital transformation challenges, contact your Account Manager or email brilliance@6dg.co.uk

**Some exclusions to the free of charge offer apply. One-off shipping and setup fees may apply*
