

# Our PoP Network At a glance

Six Degrees is a leading hosting and managed services provider in the UK, specialising in delivering application performance management, monitoring, reporting and security, deployed on hybrid public/private cloud platforms of innovation. Everything Six Degrees does is underpinned by its own data centres, data network and voice switching infrastructure.

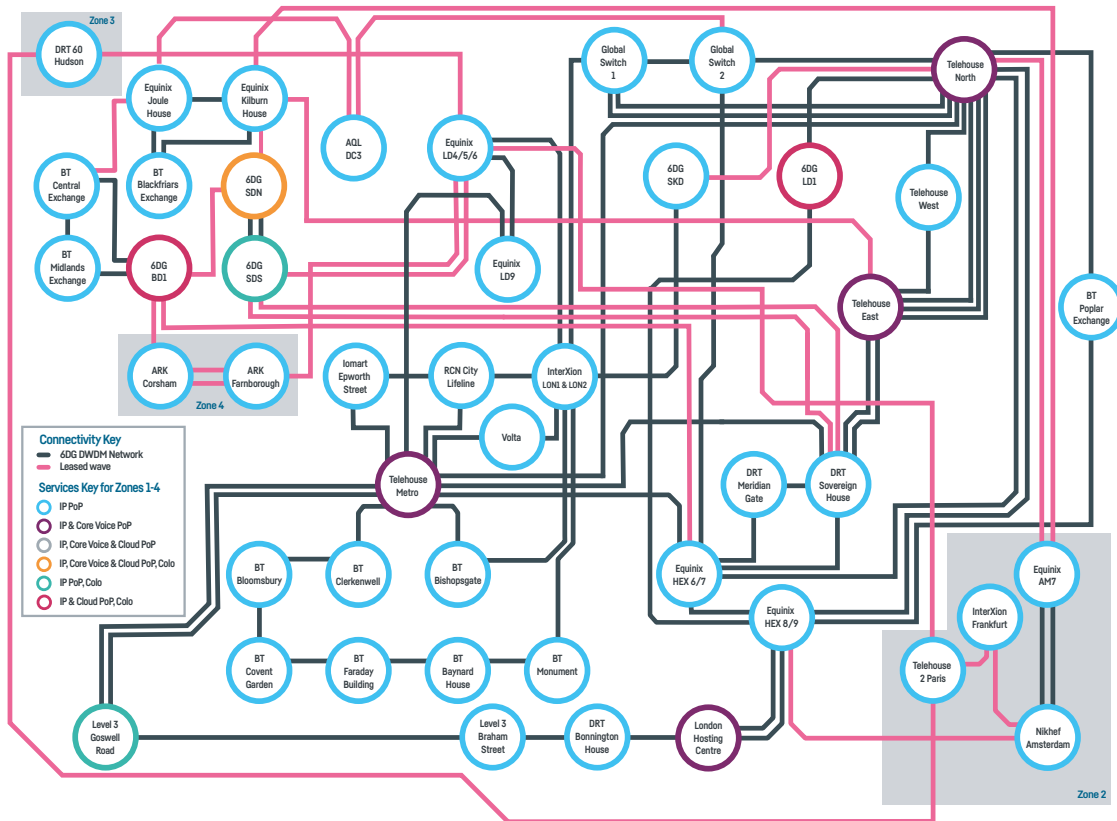

## Our Next Generation Network

We have owned and operated our own voice switching infrastructure and data network since 2001 and, following a multimillion pound investment, we have created one of the most cutting-edge next generation networks (NGNs) in the industry.

It's fast, it's secure and it will take you wherever you need it to go.

## 46 Points of Presence

More than just a UK network, we have an international reach with core Points of Presence (PoPs) on the east coast of the US and mainland Europe.
