

# NCSC ITHC PENETRATION TESTING AND PCI ASV SCANNING

CNS  
at Six Degrees

Meet accreditation requirements and understand your organisation's adherence to compliance and accreditation standards.

Six Degrees' National Cyber Security Centre (NCSC) IT Health Check (ITHC) Penetration Testing and Payment Card Industry Approved Scanning Vendor (PCI ASV) services give you the information and documentation you need to ensure adherence to your organisation's required compliance and accreditation standards. Our NCSC ITHC Penetration Testing and PCI ASV Scanning services provide an expert view of your security posture, enabling you to understand where you need to invest resource to ensure adherence.

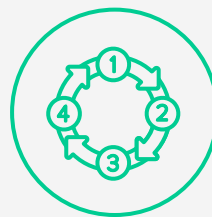

Our NCSC ITHC Penetration Testing and PCI ASV Scanning services are provided by some of the most highly experienced and accredited Penetration Testers in the industry. We are members of the NCSC's CHECK scheme, and our team members and leaders are certified under CREST and the Cyber Scheme.

## NCSC ITHC Penetration Testing and PCI ASV Scanning Types

### NCSC ITHC Penetration Testing

Six Degrees' National Cyber Security Centre (NCSC) IT Health Check (ITHC) Penetration Testing service identifies areas of weakness and provides a report that contains recommendations on how you can mitigate the risks raised during the test. The ITHC is recognised by the UK Government, and you can submit the test report generated by Six Degrees as an artefact to assist with the attainment of a recognised security accreditation or standard.

### PCI ASV Scanning

Six Degrees' PCI ASV Scanning service is an automated vulnerability scanning service that is certified to be used as part of the PCI auditing process. The scanning is managed and run by Six Degrees through an approved ASV scanning tool provided by Qualys; Qualys has been authorised by the PCI Security Standards Council to conduct the quarterly scans required to show compliance with PCI DSS. The cloud based Qualys PCI solution helps you achieve compliance via a streamlined process that also gives you assurance your network is secure.

# NCSC ITHC Penetration Testing and PCI ASV Scanning Benefits

Understand where you need to invest resource to ensure adherence to compliance and accreditation standards.

Receive clear, easy to understand reports that include remediation advice.

Work with a cyber security partner who can support you through mitigating actions.
