INTUNE QUICKSTART

Harness the power of cloud-based device management configured to industry standards by our experts.

Intune QuickStart is a one-time professional service to configure your Microsoft Intune environment to our recommended baseline, which is based on Intune policies defined within three industry recognised benchmarks: NCSC, CIS, and Microsoft.

The service enables you to take on management of a pre-configured Intune device management environment configured by certified Microsoft experts rather than taking the risk of doing it yourself and missing vital steps and industry recommended configurations.

Intune QuickStart Service Benefits

Time-saving efficiency.
Intune QuickStart enables rapid deployment of Microsoft Intune, allowing you to focus on other critical business tasks.

Enhanced security.
The service implements best practices for device management, compliance policies, and mobile data access, providing peace of mind and reducing the risk of security threats.

Centralised management.
You can efficiently manage settings, applications, and updates via the Microsoft Intune portal after this service has been delivered and handed over to you, ensuring consistent performance and productivity. The service aligns with CIS, NCSC, Microsoft Foundation Benchmark, and Cyber Essentials.

Secure, Integrated Cloud Services

Intune QuickStart Service Features

Configuration profiles

We will implement our Windows 10/11, Android, iOS and macOS configuration profiles in Microsoft Intune.

Compliance profile

We will implement our Windows 10/11, Android, iOS and macOS compliance profiles in Microsoft Intune.

Windows Operating System updates

We will configure either manual update rings or the Microsoft Autopatch service in Microsoft Intune, depending on the features available within your Microsoft 365 licences.

Application deployment policies

We will package and deploy Microsoft 365 apps, Microsoft Edge, and 7-Zip to Microsoft Intune.

Autopilot provisioning

We will configure Microsoft Intune's Autopilot feature which enables new Windows 10/11 devices to be configured automatically the first time they are turned on and logged onto by your end-users.
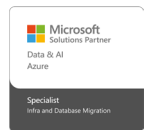

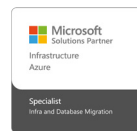

Microsoft 365 mobile app protection policies

We will implement our standard mobile application management app protection policies. These policies define how your data, held in Microsoft 365, can be accessed and used on your users' unmanaged personal mobile devices through the official Microsoft Office mobile applications.
