

ISO/IEC 27001

ISO/IEC 27001 is the international standard for information security.

ISO/IEC 27001 is the international standard for information security. The focus of ISO/IEC 27001 is to protect the confidentiality, integrity, and availability of the information in an organisation. The best-practice approach helps organisations manage their information security by addressing people, processes, and technology.

Certification to the ISO/IEC 27001 standard is recognised worldwide to indicate that your organisation and information security management

system (ISMS) is aligned with information security best practices. It is suitable for all types and sizes of organisations – the many clients that Six Degrees has helped to achieve certification range in size from just seven employees to over 100,000.

Six Degrees will assist you in becoming ISO/IEC 27001 certified and building a culture within your organisation that makes security a business-as-usual activity.

Benefits of Becoming ISO/IEC 27001 Certified

What It Does	Why This Matters	What This Means
Helps to protect business reputation and improve competitive advantage.	Demonstrates that information security is continually being improved. Provides a level of assurance that risks to information are being managed effectively and appropriately.	Retain clients and win new business. Gives competitive advantage and helps to win new business by demonstrating effective security practices leading to improved trust and credibility.
Effective risk identification and management.	Allows businesses to continually identify potential weaknesses using a defined and consistent risk assessment methodology and implement controls that are proportionate to the risks.	Ensures that the confidentiality, integrity, and availability of information is assured.
Ensures compliance with relevant legislation.	Provides a framework to help manage legal and regulatory requirements.	Reduces the likelihood of data breaches and fines while protecting your information. Demonstrates to partners and stakeholders that a multi-faceted approach has been taken to protect data in the event of a breach.

How We Guide Organisations to ISO/IEC 27001 Compliance

Six Degrees' Governance, Risk and Compliance (GRC) team can assist organisations of all sizes to build a defined framework for managing their information security, as well as an ability to demonstrate compliance with information security legislation and regulations. Our experienced consultants will work with you to ensure the necessary controls, governance, awareness, and supporting documentation are created to help you achieve certification.
